INTERNATIONAL SEARCH REPORTInternational application No.
PCT/US00/20131**Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)**

This international report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:

2. Claims Nos.: 2, 8-23, 30, 35-38, 40, 44, 49-77, 80, 85 and 87 because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

Please See Extra Sheet.

3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

1. As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

The additional search fees were accompanied by the applicant's protest.
 No protest accompanied the payment of additional search fees.

BOX I. OBSERVATIONS WHERE CLAIMS WERE FOUND UNSEARCHABLE**2. Where no meaningful search could be carried out, specifically:**

The functional and structural limitations of the recited "intrabody" lack such meaningful written description that a search cannot be directed to the element. Further as to the recited intrabody of claims 21, 22 and 38 which recite a specified SEQ ID NO: such elements cannot be meaningfully searched as the case lacks proper sequence compliance as indicated in the CRF error report of 9-18-00 for which no response has been filed. Claims 2, 30, 40, 44, 56, 63, 69, 73, 80, 85 and 87 lack meaningful limiting structural or functional structure to the elements of the recited acronyms SOD, AR, CACNL1A4, SCA7, FTD, SBMA, DRPLA, SCA1, SCA2, SCA3/MJD, SCA4, SCA5, SCA6 and SCA7 such that a meaningful search may be carried out or such that the patients may be distinguished.
